ROVER RANGE

Aspirational Design Meets Functional Solutions

Refine, Reconfigure, Rover®

Introducing the Rover® Range

At the heart of the Rover Range's design is a commitment to sustainability and style, with 50x50mm real timber accents from FSC-certified sources adding a touch of nature to every piece. The range is wrapped in acoustic recycled board, boasting a high NRC rating of 0.35, with curved corners and a standard charcoal hue, customisable from a palette of 35 vibrant colours to match any decor.

Crafted with mobility at its core, the Rover Range features large medical-grade castors, ensuring effortless shifting to reconfigure your space instantly. Stability is uncompromised, thanks to total locking castors that secure both swivel and wheel, anchoring your furniture precisely where you need it.

Every element, from soft-close hinges on cupboards to the harmonised heights across the family of 11 versatile products, is thoughtfully selected to enhance your space's functionality and aesthetics.
The range includes innovative solutions like double-sided glass whiteboards, credenzas with planter box options, mobile TV cabinets, and coordinated planters for mixed unit screening walls, all designed to support flexible, collaborative workspaces.

Embrace the future of workspace design with the Rover Range, where flexibility meets sophistication, enabling you to create, collaborate, and adapt with unparalleled ease.

Embrace the future of workspace design with the Rover Range, where flexibility meets sophistication, enabling you to create, collaborate, and adapt with unparalleled ease.

See how our innovative Rover Range can be easily rearranged to suit any education or office fit-out requirements.

Harmonising Aesthetics and Acoustics

The Rover Range by Total Fitouts revolutionises workspace acoustics with its innovative use of acoustic recycled board panelling, achieving a high Noise Reduction Coefficient (NRC) rating of 0.35. This cuttingedge design not only enhances the aesthetic appeal of your workspace with its sleek, curved corners and customisable colour palette but also significantly improves sound absorption. The inclusion of real timber accents from FSC-certified sources adds a natural touch while contributing to the overall acoustic performance.

By integrating these panels across the range, the Rover Range ensures a quieter, more focused work environment, making it the ideal solution for dynamic, adaptable workspaces seeking both style and functional acoustic solutions.

Redefining Modern Learning Spaces

with Rover Range.

The landscape of educational spaces is undergoing a profound transformation, responding to the evolving needs of modern learning environments that prioritise flexibility, engagement, and a connection to the natural world.

Today's educational centres demand multi-use areas capable of supporting a variety of teaching methods and learning activities, from collaborative group work to individual study. Mobility within these spaces is crucial, allowing for seamless transitions between different learning setups and fostering an adaptive learning environment.
Moreover, integrating natural elements into design has become essential, promoting well-being and enhancing the aesthetic appeal of educational settings.

The Rover Range is meticulously designed with these contemporary needs in mind. Featuring large medical-grade castors for easy mobility, real timber accents from FSC-certified sources for a touch of nature, and versatile, multi-functional furniture pieces, the Rover Range offers the perfect blend of flexibility, durability, and sustainable design.

This makes it an ideal choice for educational spaces looking to embrace the future of learning while creating an inspiring, adaptable, and harmonious environment.

Biophilic Design

The Rover Range's Natural Edge in Modern Workspaces.

In response to the evolving landscape of work environments, the Rover Range addresses the growing need to not only foster productivity but also enable a connection to the natural world.

As workspaces become more fluid and adaptable, integrating elements of nature through design becomes paramount. The Rover Range ingeniously incorporates planter boxes and stand-alone plater trolleys with a neutral colour palette, directly embedding the calming and restorative benefits of nature into the office. This deliberate choice supports biophilic design principles, which have been shown to reduce stress, enhance creativity, and improve overall employee health and satisfaction.

This approach not only meets the aesthetic and functional needs of modern workspaces but also aligns with the growing trend towards more environmentally responsible and human-centric design.

FSC

FSC-certified 50x50mm finished size real timber providing timber accents to all furniture pieces.

Mobility at its core

One of the Rover® Range's key features is its mobility.

Each piece is equipped with large medical-grade castors, allowing for effortless movement and reconfiguration of spaces. This is ideal for agile working environments where teams need the freedom to adapt their space for different tasks and collaborations. The total locking castors ensure that, despite this mobility, the furniture remains stable and secure once positioned, providing a firm foundation for work.

The Rover Range truly shines in its adaptability.
With versatile products like double-sided glass whiteboards, mobile TV cabinets, and credenzas with planter boxes, each designed to serve multiple purposes and adapt to various functions, you have the freedom to create a workspace that suits your needs. The inclusion of real timber accents and acoustic panelling adds a touch of nature and sound absorption, fostering a more pleasant and productive workspace.

Combining mobility, functionality, and design, the Rover Range offers a comprehensive solution for modern workspaces, enabling businesses to create environments that evolve with their needs.

4x Large medical grade, swivel & lock with 2x braking castors to fix in place.

Complimentary acoustic recycled board outer lining rated at 0.35 NRC rating with distinct curved corners-standard charcoal colour.
